INTRODUCTION

Turn-based Strategy is one of the most popular gaming concepts around the world with a typical name like Final Fantasy. Although it has been out for quite some time now, Final Fantasy is still a game series that is loved and well-known by gamers. **When it comes to Final Fantasy, fans not only remember the gameplay but also the story of legendary characters** such as Cloud, Tifa, Lightning, Sephiroth, and many other characters.

This is a great source of inspiration for Faraland game developers. With the application of blockchain technology, we want to build **Faraland that is more than a game, but a world, a series that lives on.** The goal is to create a turn-based strategy or Turn-based Strategy game on blockchain that is “unique” enough to follow and continue the footsteps of the Final Fantasy series.

Not only Game but novels, comics, and most likely movies will also be a part of Faraland’s series. Everything is being conceived and waiting for the right time to launch. A huge and fascinating world is waiting for you!

GAME OVERVIEW

Faraland is a turn-based strategy & RPG game developed on blockchain technology by Moon Knight Labs. Joining the Faraland universe, players will transform into one of 7 races engaged in the journey to protect the Magic Crystals, fight against Demon Lord and search for the Book of God to win the glory for the race.

With the desire to create a game universe that immerses players in a limitless imagination world, Faraland was originally created by our development team with Unique NFT Heroes, **Unique plots and art, Original game code.**

UNIQUE NFT HEROES

With blockchain application to create the game, Faraland's heroes are created by Smart Contract that helps to ensure the uniqueness of each hero. With a limited number, 20,000 NFT is considered the soul of the project and the owner of the Faraland continent.

UNIQUE PLOTS AND ART

The plot of Faraland is built on the plot of the novel Faraland with a fairy world and endless journey of discovery. The player's journey will not take place linearly, each decision in the quest will lead us to a separate storyline, forcing players to dig into and piece together every little detail in order to achieve rewards.

The visual of the game is also created to synchronize with the context of the plot. Each character in Faraland has a unique appearance created by our artist.

ORIGINAL GAME CODE

We create a product with its own uniqueness. Along with a high standard of gameplay and unlimited creative ideas, we make everything in Faraland from scratch meticulously.

NFT

In Faraland, players control the characters of 7 races: Humans, Orcs, Elves, Fairies, Dragonborns, Angels, and Demons to join PvE and PvP to earn exclusive rewards in game.

HUMAN

(50% population)

Humans are the largest inhabitants of the Faraland Continent. Human heroes' strength lies in their military skills and advanced technological development. Humans can play as tanks, gladiators or magicians.

ORC

(24,6% population)

The Orcs are known for their superior physical strength and outstanding endurance in the whole Faraland continent. They are born with muscular bodies and a seemingly unlimited fighting power. They can take the forefront with their impressive vitality and great physical strength.

ELF

(20% population)

Elves are the spirits of the deep forest. With high agility, they are suitable for long distance attacks. As expert weapon masters, they are efficient assassins when equipped with daggers and knives.

FAIRY

(4% population)

Fairies hold the magic of nurturing and protecting the flowers. Holding a vast amount of magic, Fairies can be a great support to a team when equipped with wands and daggers.

DRAGONBORN

(1% population)

Dragons are a mythical race of the Faraland Continent. With abundant vitality and ancient magic, Dragonborn is the only race in the game that possesses both physical and magical damage at a very high level.

DEMON

(0.2% population)

In the legend, Demons are divided into two types: Pureblood Demons and Dark Shadow. The most commonly used weapon by Demons is the Crescent or Dark Crystal Ball.

ANGEL

(0.2% population)

Angels are true Gods, so their Intelligent stat is extremely high. Having the power from another planet, they also have a tall build and wings, which makes them flexible in the battlefield.

RANKING OF BODY PART

Each Heroes is a unique NFT made up of a rare combination of:

Skin  **Eyes** 

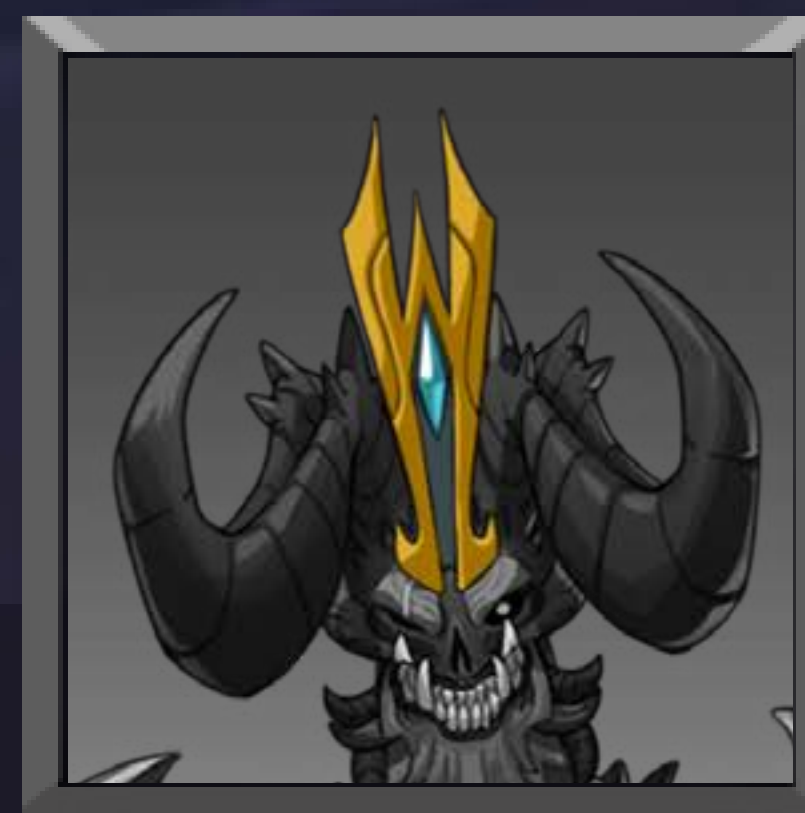

Scar  **Hair** 

Tattoo  **Mouth** 

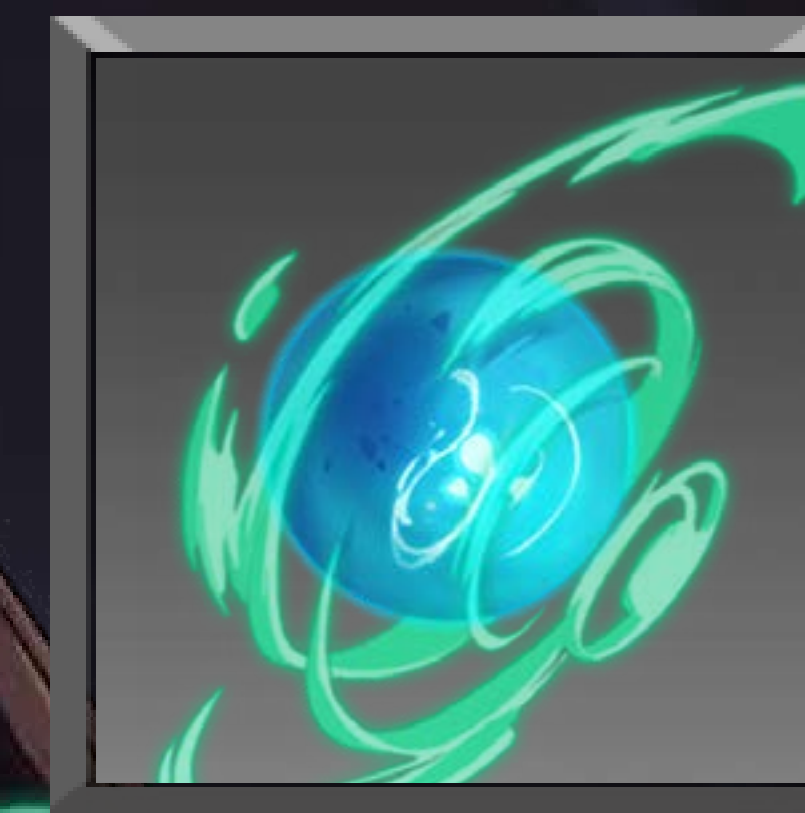

COMMON **UNCOMMON** **RARE**
EPIC **LEGENDARY** **MYTHICAL**

EQUIPMENT

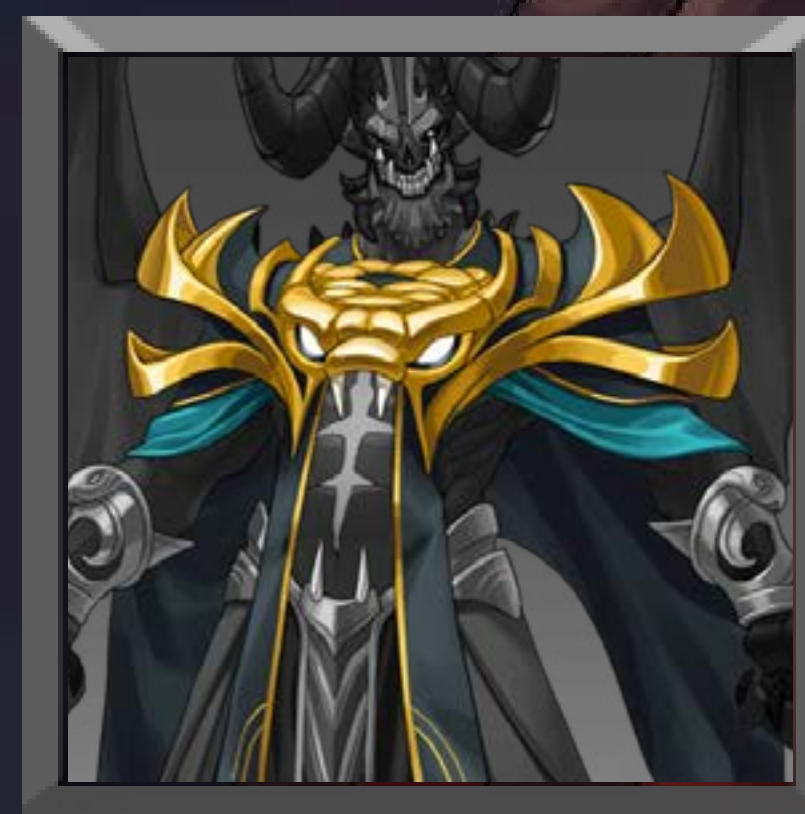

Helmet

Sub Weapon

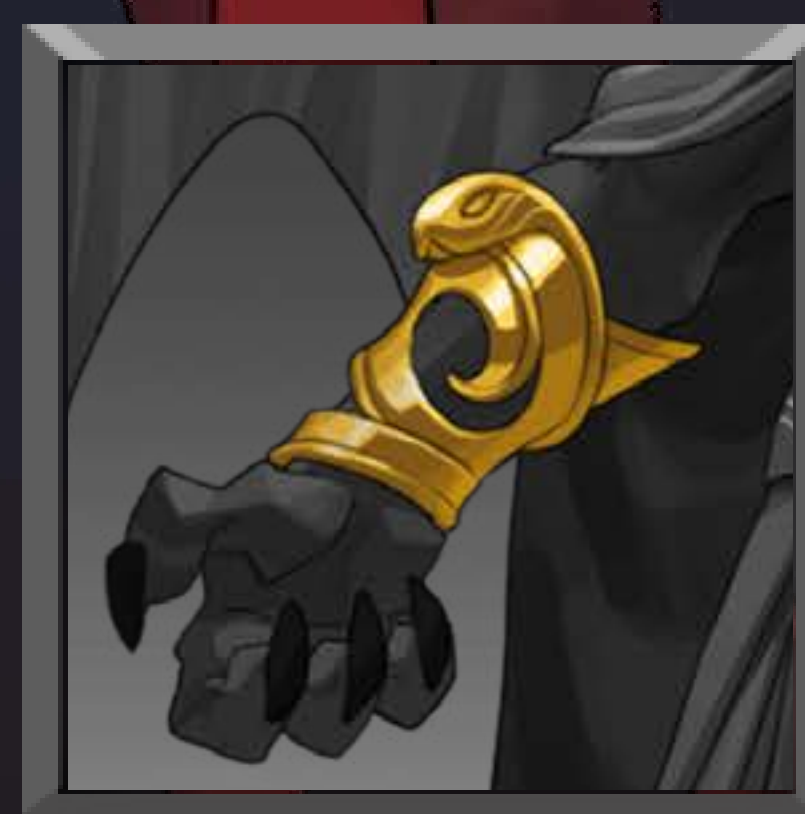

Armor

Pants

Gloves

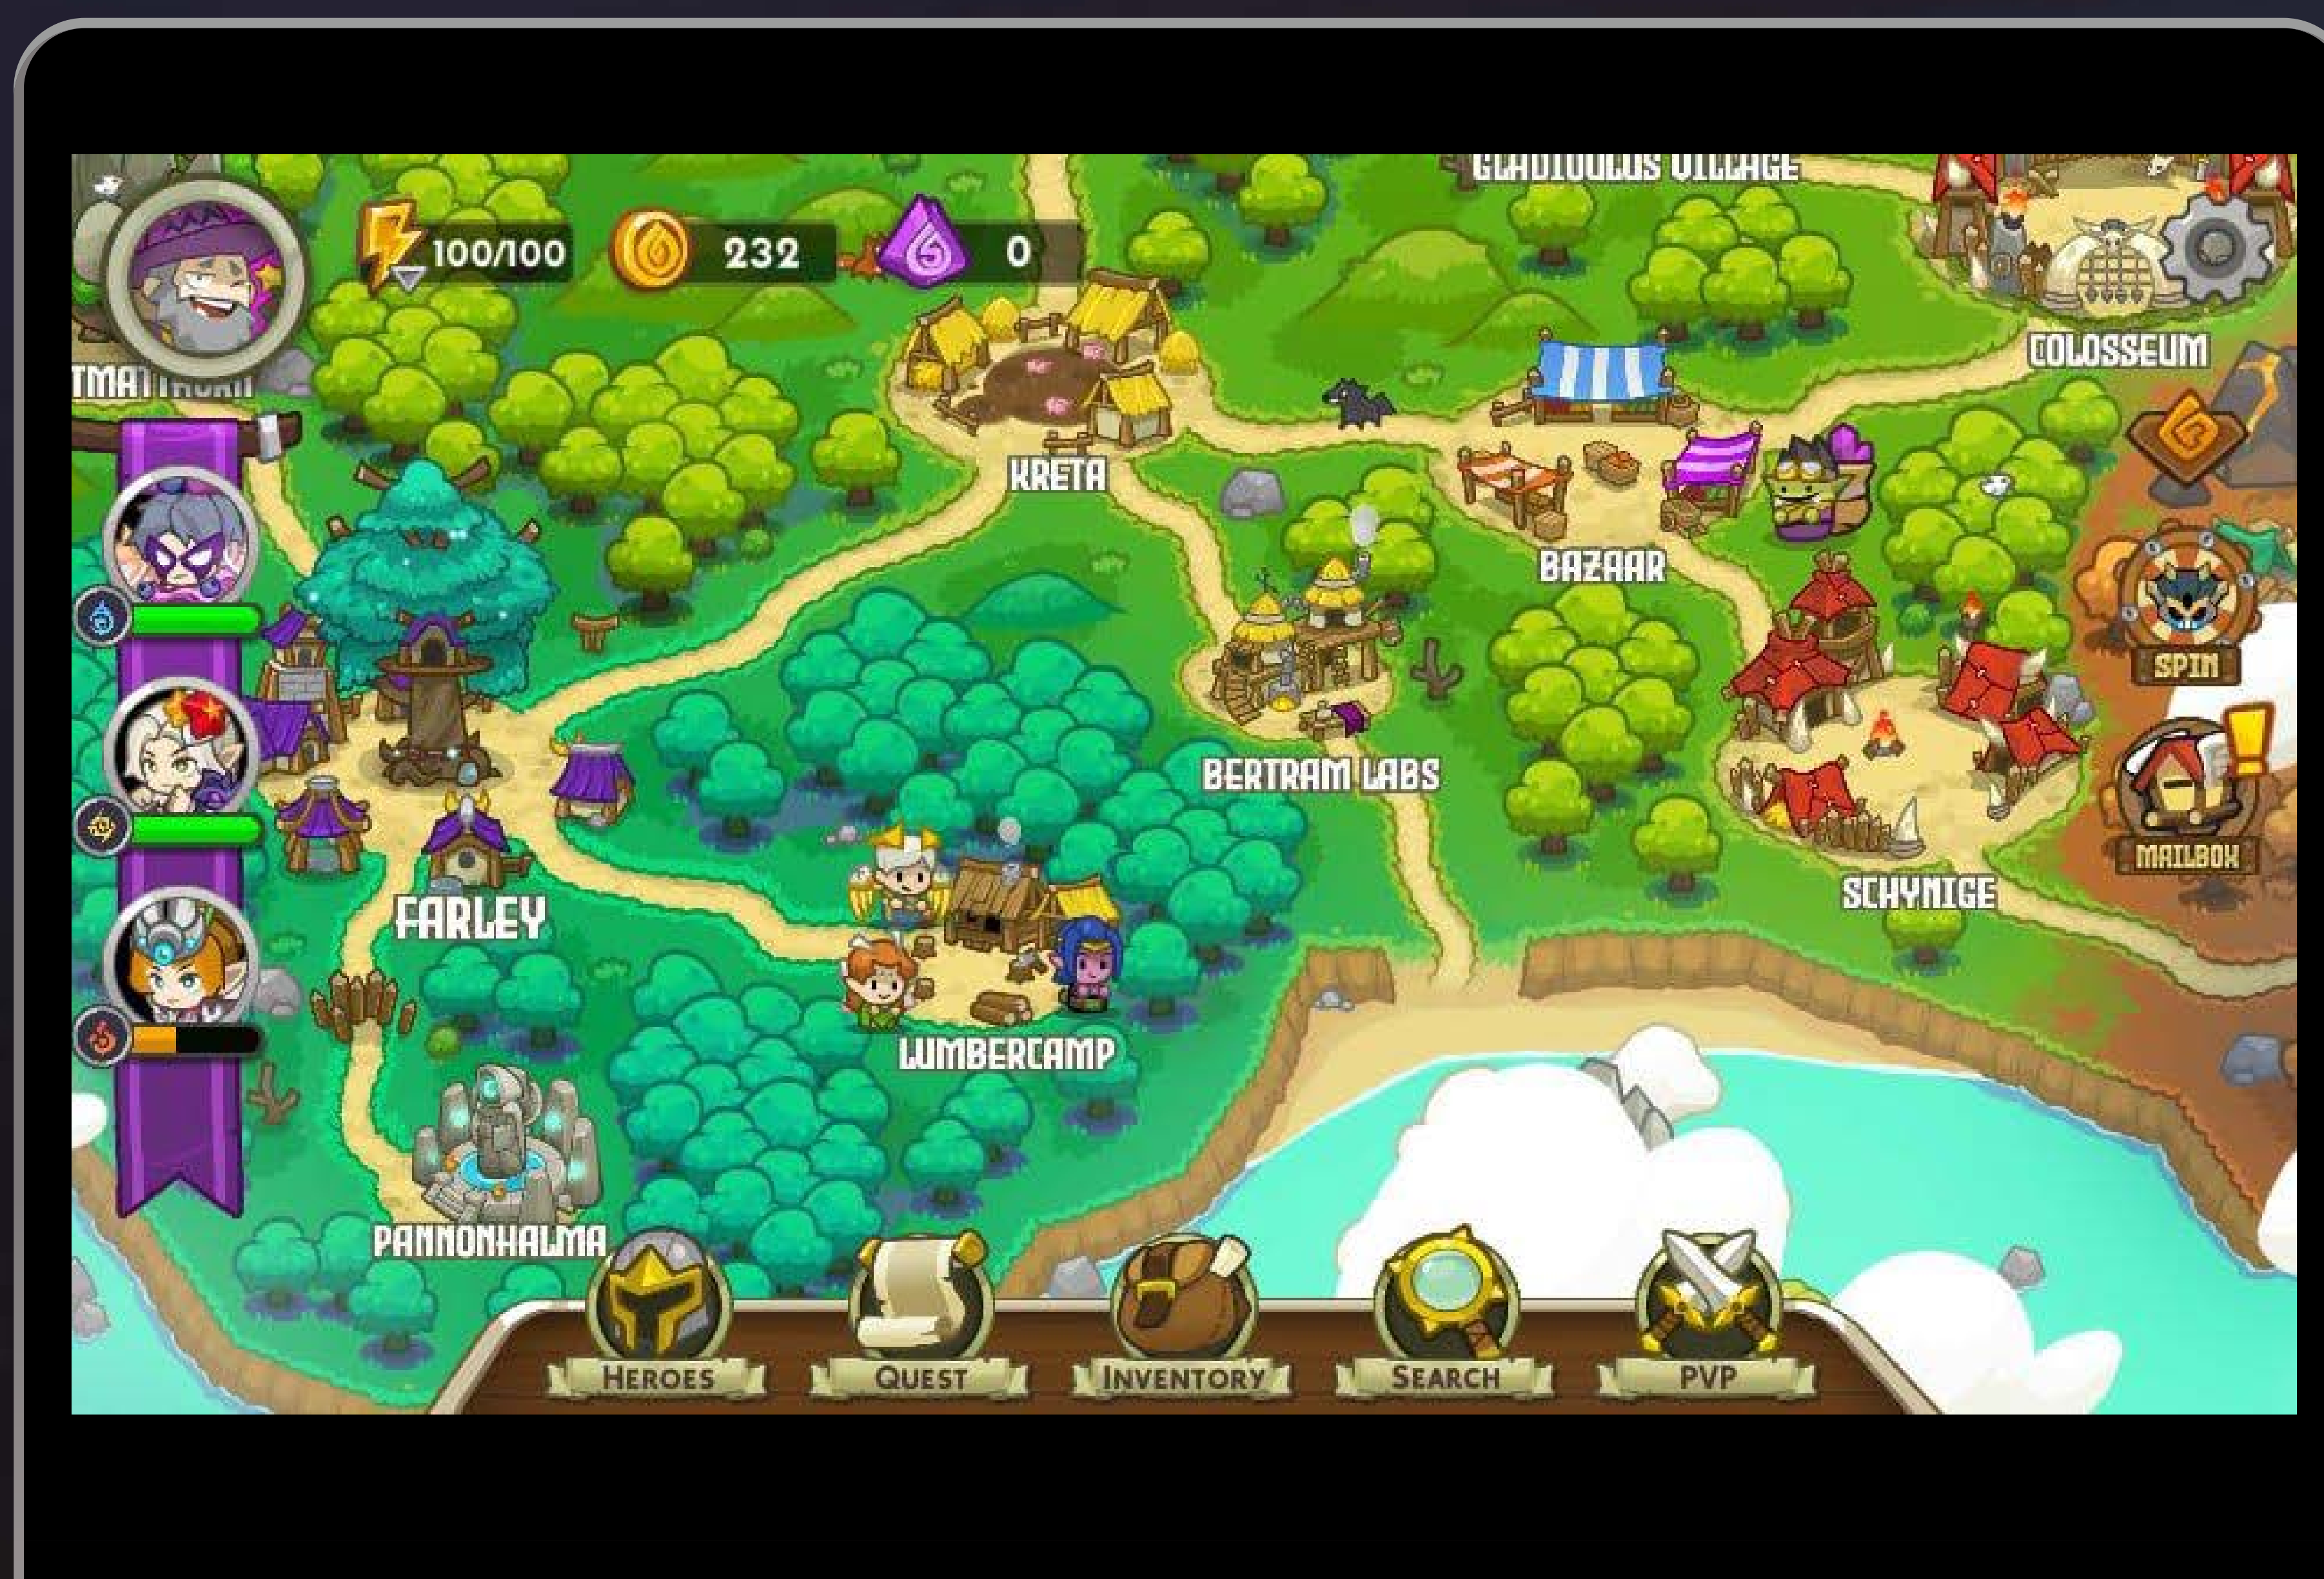

Boots

GAMEPLAY

PvE

PvE is a game mode to explore the continent of Faraland. Players will join the journey against the demon lord Beelzebul to protect the world. In that journey, players will build their squad with the best heroes of the 7 races, explore vast lands with many types of terrain and encounter different types of monsters.

GAMEPLAY

PvP

PvP is an online Arena battle feature between players. The most prominent and attractive feature is the turn-based tactical gameplay featured with a variety of skills and equipment. Players can customize their squad in a different way with many different types of tactics and character building.

GAME FEATURES

CRAFTING

Crafting is a gameplay feature where new items can be created by combining crafting materials. All Materials obtained by players can be withdrawn via Claim Portal. Once claimed, players can trade and exchange NFT materials in the marketplace. After collecting enough materials, players can create new items in the Crafting tab of the Faraland website.

Artisan Blacksmith is a feature that allows crafters to manufacture goods of the highest rarity after a specific amount of crafting tries.

When a craft achieves a particular level, it triggers the Artisan Blacksmith state, ensuring the manufacturing of extremely uncommon artifacts.

GAME FEATURES

LADY OF THE LAKE

Inspired by an ancient European myth, the “Lady of the Lake” is a place where players can interact with a Goddess by a holy lake, which gives them the chance to possess items of high rarities. Even better, players with more luck can earn a progressively staked reward – the Senora Chest.

This feature addresses the widely encountered problem of excessive inventory items.

GAME FEATURES

DEMI HEROES

Miesen is one of the busiest cities in the Faraland continent. However, a chaotic war occurred that transformed Miesen from a beautiful land into eternal ice. The citizens trapped in this world are called Demi. Demi can only maintain their existence for a certain amount of time by using an energy source known as "Soul Stone".

GAME FEATURES

WORLD BOSS

World Boss fiercely fights in turn-based gameplay so that players can craft their tactics when confronted with tough missions. In addition to Emperor Stone as a glittering reward, other rare NFT items such as Materials, Legendary items, Mythical items and some more will also be added as rewards after vanquishing World Boss.

REALM WARS

GAME FEATURES

REALM WARS THE FLIGHT HAS JUST BEGUN

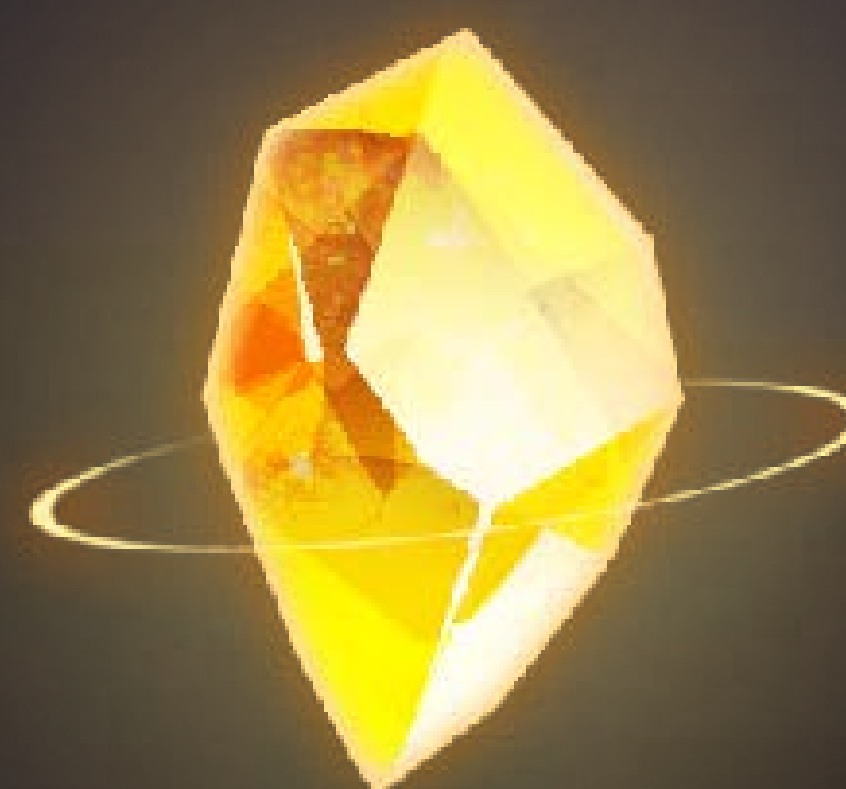

The land system is the latest feature in the Faraland ecosystem. Operating completely on-chain, it is a function that helps players get more perks and rewards. Each piece of Land is also a unique NFT sold in a limited quantity. Landowners will constantly gain a passive income from the land market fee. Besides, players can also assign their heroes onto Land Wars to retrieve valuable loot.

GAME FEATURES

GUILD

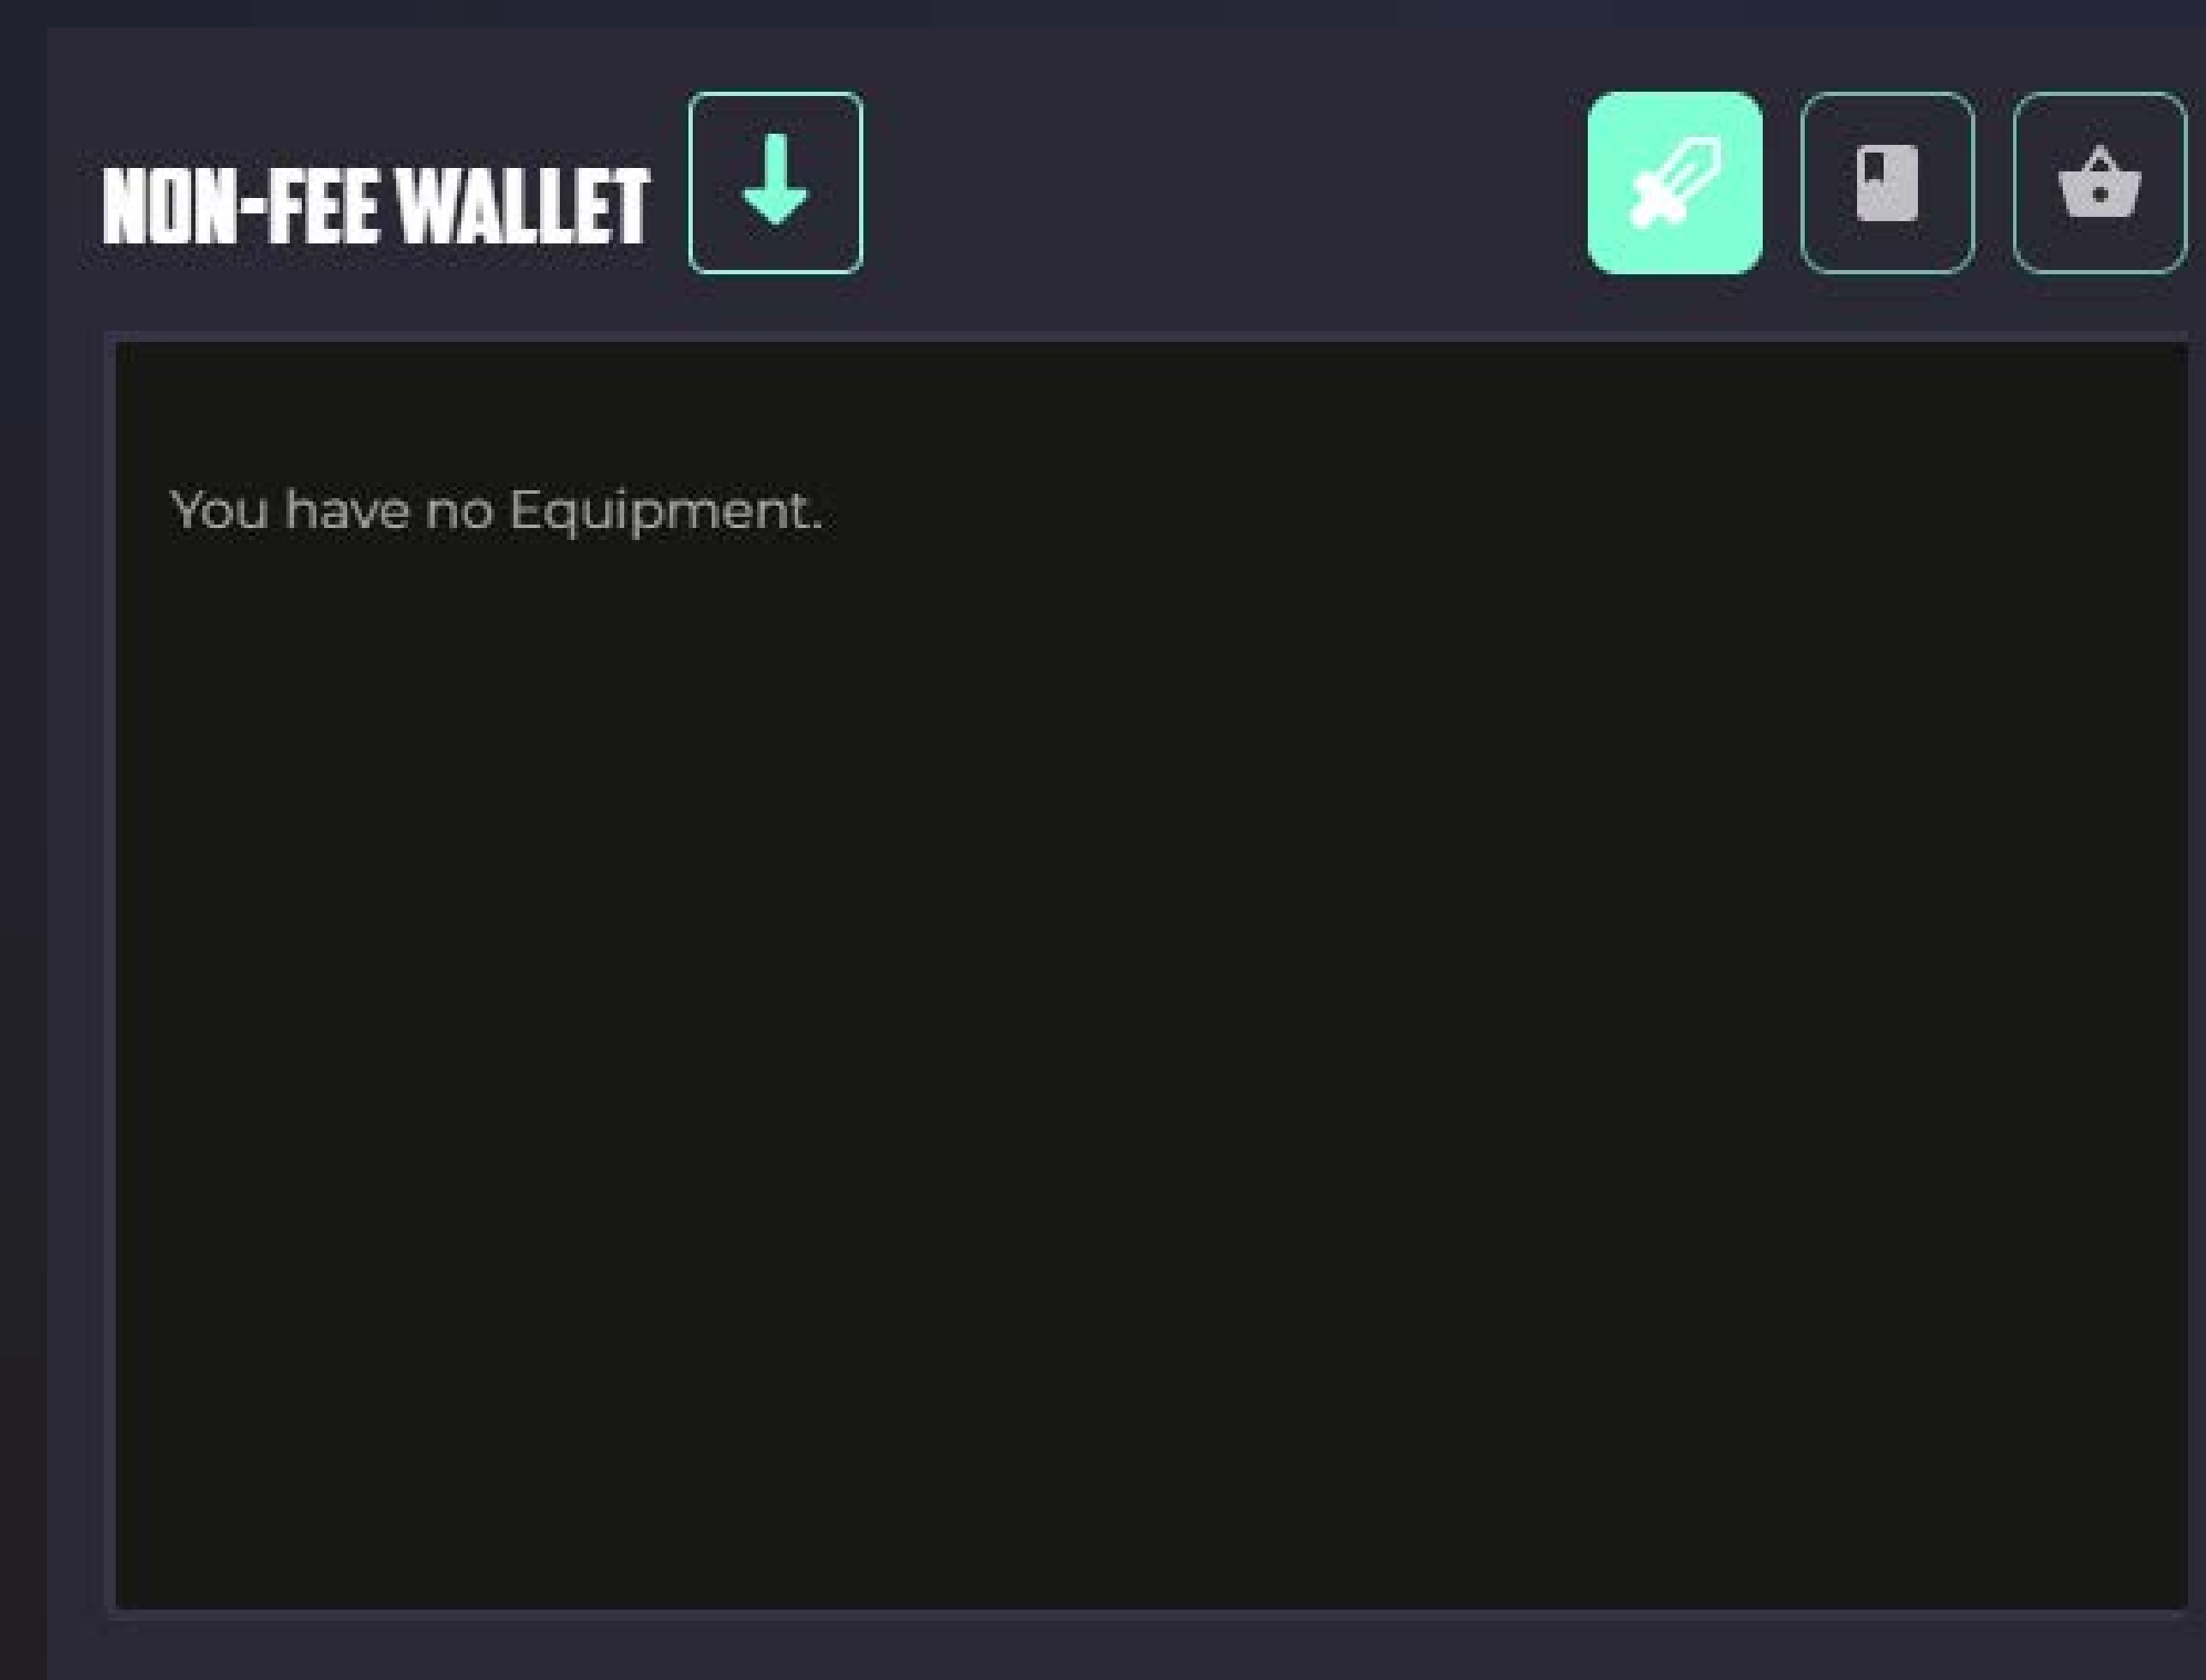

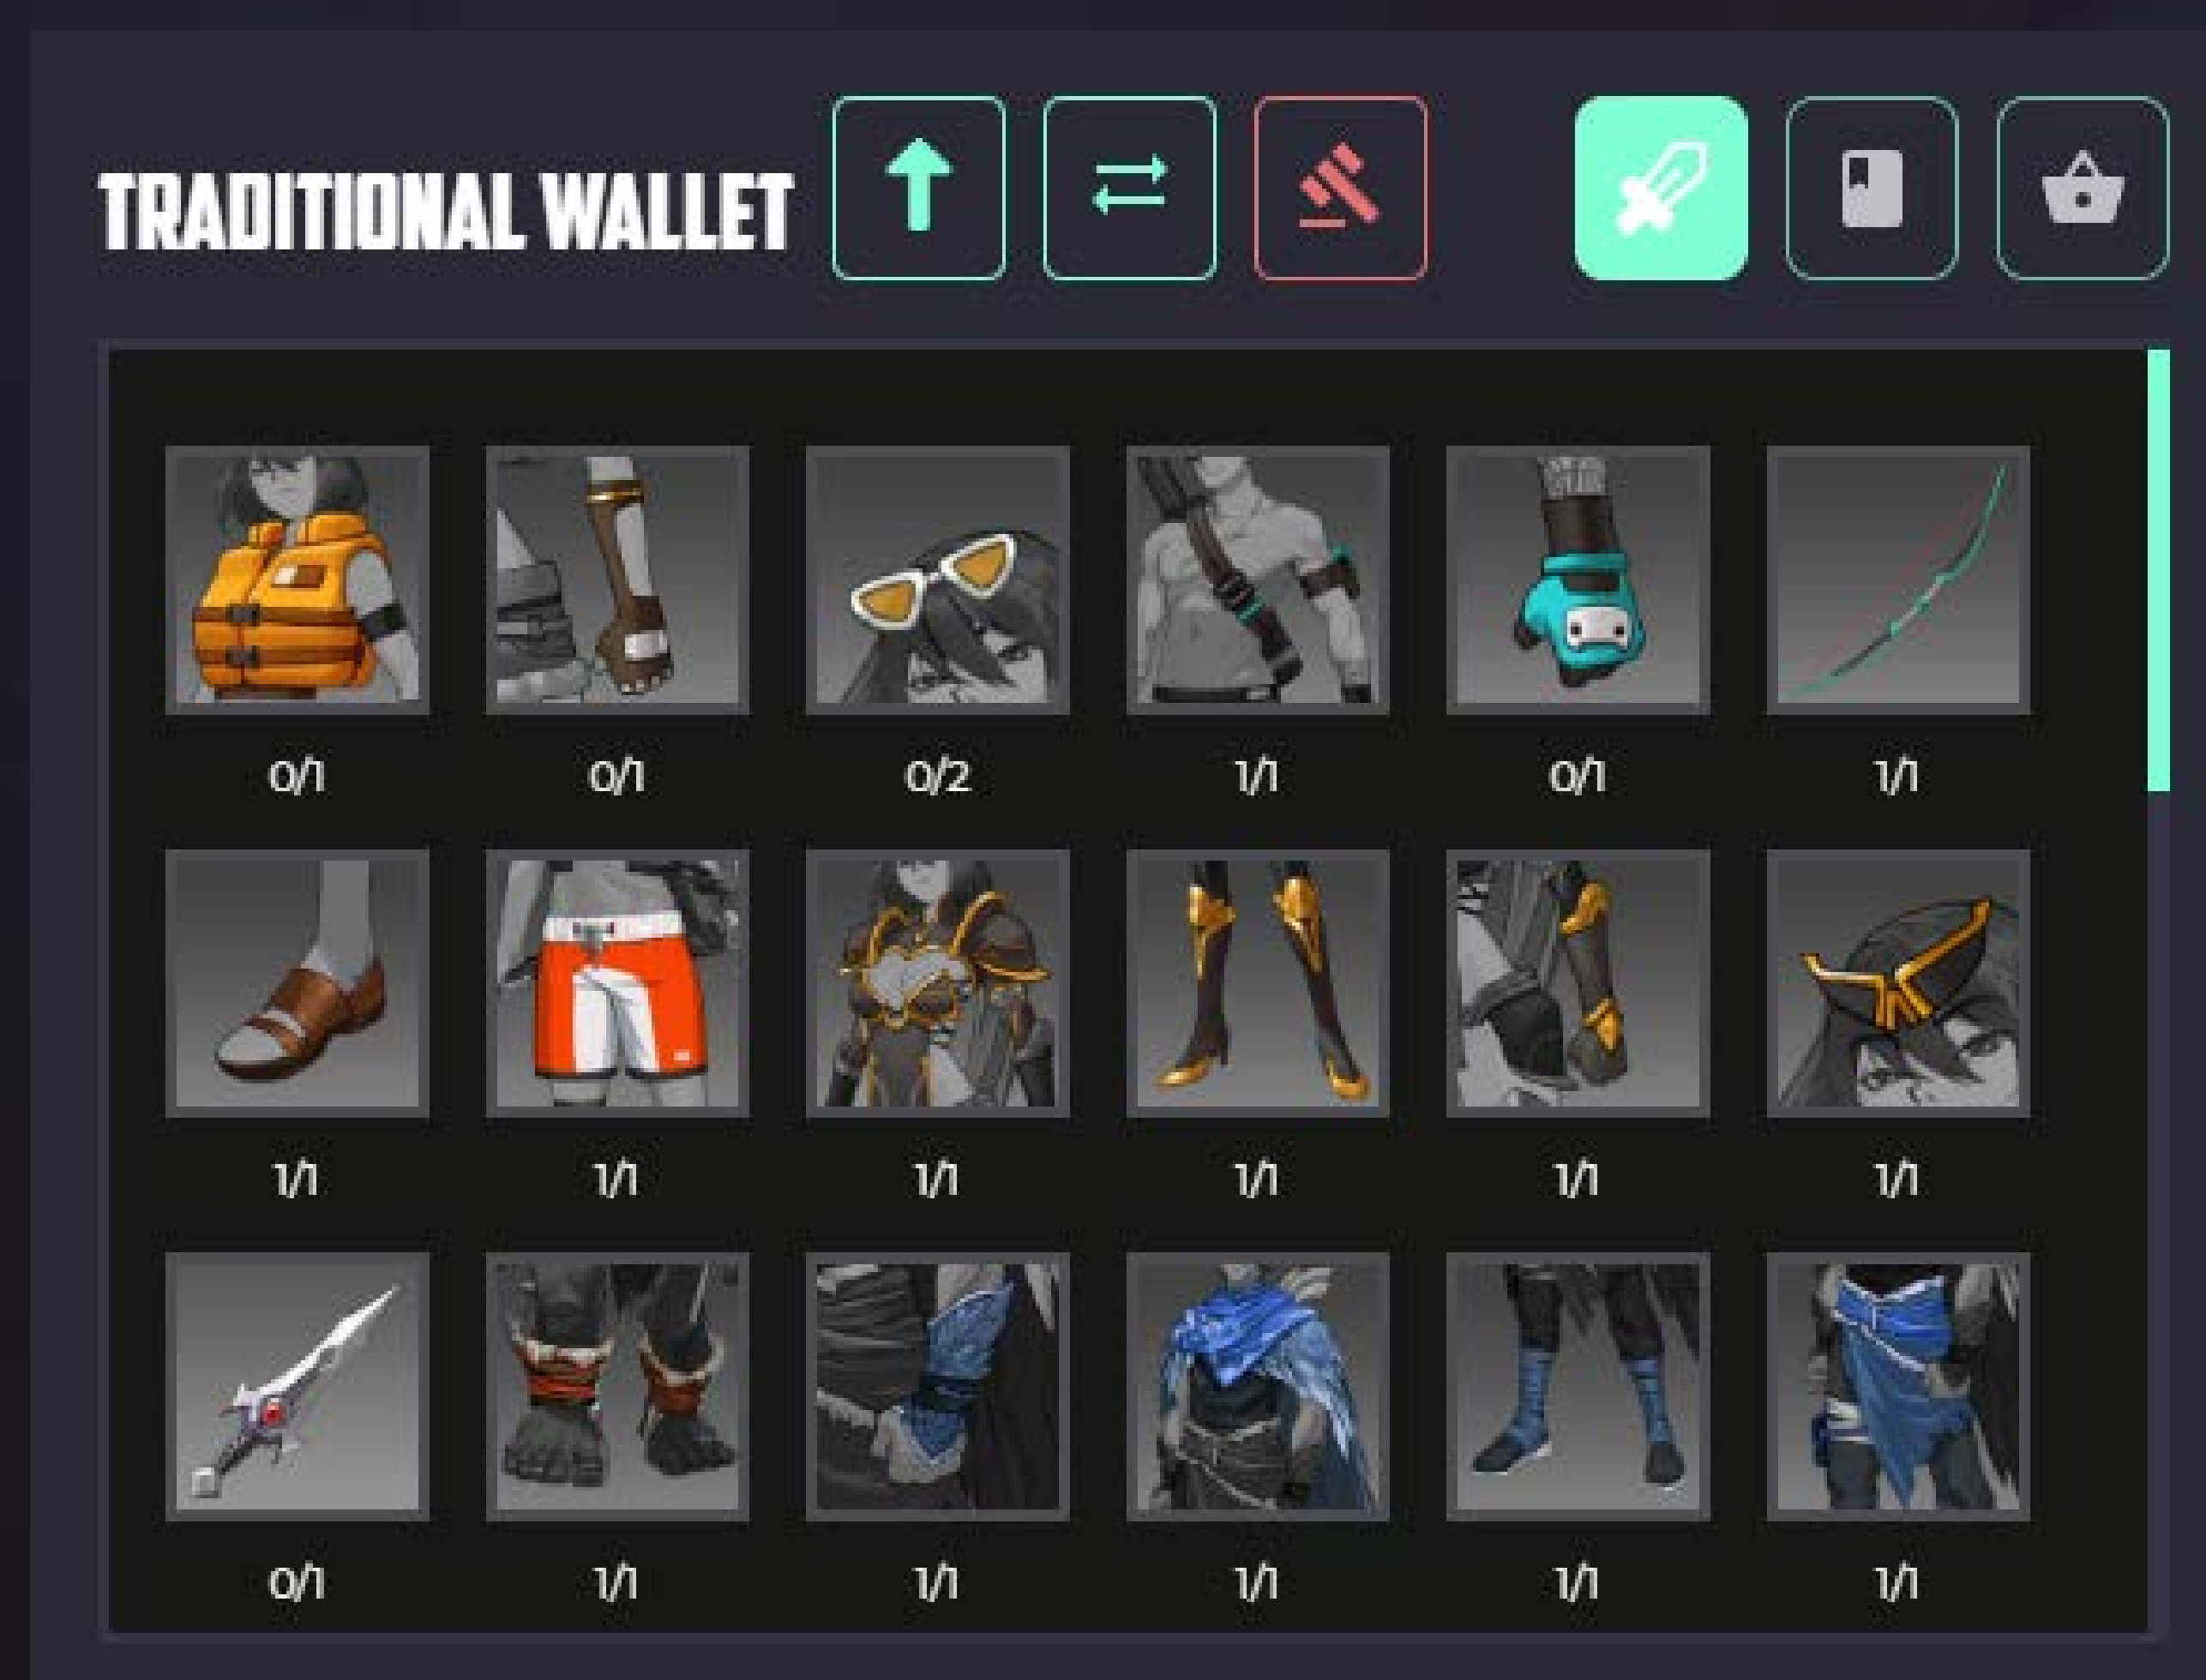

Guilds are one of the special features of Faraland. Any player who owns an Emperor Stone and 20,000 \$FARA can recruit members and create their own Guild on Faraland's homepage.

GAME FEATURES

NON - FEE WALLET

Non-fee Wallet is a wallet where you can deposit tokens to use with no fees and is used in conjunction with the Black Market. Non-fee Wallet was created to help players perform operations on NFT/Items in their game at no extra cost, while the features are still the same as the Traditional Wallet.

GAME FEATURES

REWARD PORTAL

Players can claim Soul Stones and Emperor Stones through the Reward Portal.

OTHER FEATURES

MARKETPLACE

Marketplace is a place to buy, sell and exchange NFT game assets, exclusively for Faraland players. As soon as the NFTs heroes are “revealed”, players can sell on the Marketplace on Faraland.io in the form of auctions.

NFTs belonging to rare races such as Angels, Demons or possessing special skills or physical characteristics will be priced higher.
